

A genealogical profile of Robert Gorges

Birth: Robert Gorges was baptized on November 15, 1595, at St. James, Clerkenwell, Middlesex.

Death: Nothing is known of his place or date of death.

Ship: Unknown, 1623

Life in England: Robert was the second son of Sir Ferdinando Gorges by his first wife, Anne Bell. He had been involved in the Venetian wars before he returned to England to assume the position of Governor of New England for his father.

Life in New England: Robert Gorges' time in New England was brief. He first arrived about the middle of September 1623. His council consisted of the Admiral of New England, Francis West; Captain Christopher Levitt; and the Governor of New Plymouth, William Bradford. As Governor of New England, Gorges was to prevent "interloping and disorderly trading" in New England. He and his company of men and families settled in the deserted houses of Wessagusset [Weymouth]. Robert Gorges and most of his company returned to England the next year, "not finding the state of things here to answer his quality and condition." Some men remained in Wessagusset, making it the second permanent English settlement in New England.

Family: There is no evidence that Robert Gorges married or had children.

Where do I go from here?

Researching your family's history can be a fun, rewarding, and occasionally frustrating project. Start with what you know by collecting information on your immediate family. Then, trace back through parents, grandparents, and beyond. This is a great opportunity to speak to relatives, gather family stories, arrange and identify old family photographs, and document family possessions that have been passed down from earlier generations.

Once you have learned all you can from family members, you will begin to discover other sources. A wide variety of records can help you learn more about the lives of your ancestors. These include birth, marriage, and death records; immigration and naturalization records; land records; census records; probate records and wills; church and cemetery records; newspapers; passenger lists; military records; and much more.

When you use information from any source — an original record, a printed book, or a website — always be careful to document it. If you use a book, you should cite the author or compiler, the full title, publication information and pages used. Also be sure to record the author's sources for the information. If the author's sources aren't provided, you will have to try to find the original source. Many genealogical works contain faulty information, and the Internet also contains many inaccuracies. In order for your work to be accepted — by lineage societies and other genealogists — it must be properly documented.

IMPORTANT GENEALOGICAL RESOURCES
