

A genealogical profile of Richard Greene

Birth: Richard Greene was born by 1600, assuming he came to New England as an adult.

Death: He died in Plymouth about October, 1622.

Ship: *Charity* or *Swan*, 1622

Life in England: He was the brother-in-law of Thomas Weston, who established the English colony at Wessagusset [Weymouth].

Life in New England: Richard Greene came to New England in the summer of 1622. He was in the company of his brother-in-law, Thomas Weston, and a number of colonists. Shortly after their arrival in New England, Thomas Weston left for Virginia aboard the *Charity* on a trading voyage. Richard Greene was left in charge of the new colony at Wessagusset. The colonists were soon running short of food, and getting into trouble for stealing corn from the Natives. After the corn harvest, Greene proposed a joint venture with the Plymouth colonists to trade for corn. While preparations were underway, Greene died suddenly in Plymouth, "to whom we gave burial befitting his place, in the best manner we could."

Family: There is no evidence that Richard Greene married or had children.

Where do I go from here?

Researching your family's history can be a fun, rewarding, and occasionally frustrating project. Start with what you know by collecting information on your immediate family. Then, trace back through parents, grandparents, and beyond. This is a great opportunity to speak to relatives, gather family stories, arrange and identify old family photographs, and document family possessions that have been passed down from earlier generations.

Once you have learned all you can from family members, you will begin to discover other sources. A wide variety of records can help you learn more about the lives of your ancestors. These include birth, marriage, and death records; immigration and naturalization records; land records; census records; probate records and wills; church and cemetery records; newspapers; passenger lists; military records; and much more.

When you use information from any source — an original record, a printed book, or a website — always be careful to document it. If you use a book, you should cite the author or compiler, the full title, publication information and pages used. Also be sure to record the author's sources for the information. If the author's sources aren't provided, you will have to try to find the original source. Many genealogical works contain faulty information, and the Internet also contains many inaccuracies. In order for your work to be accepted — by lineage societies and other genealogists — it must be properly documented.

IMPORTANT GENEALOGICAL RESOURCES
